Policy: NA · Mode: NA · Control: NA

Effect / Claim (KRW)	Saving Today (Est.)	Saving MTD (Est.)
NA	**NA**	**NA**
Saving QTD (Est.)	Welch p-value	Guardrails
NA	**NA**	**NA**

Executive Highlights

- Generated: 2026-02-21 11:19
- Guardrails decision: **HOLD**
- Best estimate effect per claim (Control – Treatment): **14,767■**
- Welch p-value: **0.5413**
- Segment alerts (FDR): **0**
- Treatment group applies the fraud review policy; Control group follows baseline.
- Estimated savings are computed as (Control mean paid – Treatment mean paid).
- If Guardrails is GO: continue rollout.
- If HOLD: keep current stage and monitor.
- If ROLLBACK: revert rollout stage and investigate alert segments.

Key Charts

Methods Summary (Top 3)

Estimator	Effect/Claim (KRW)	p-value
Unadjusted (Diff-in-Means)	14,767■	nan
Welch t-test (SciPy)	14,767■	0.5413293729905928
